No. 420

NEW...

CHAN NEL LOCK

PLIER

TRADE MARK REG. U. S. PATENT OFFICE

THE PLIER DESIGN THAT OBSOLETES ALL OTHERS!

Here's why it's better than ever . . .

1. Interlocking principle positively prevents slipping under any load . . . the heavier the job, the greater the interlocking action.
2. New type wide base lugs provide maximum cross section strength . . . cannot shear.
3. New nose design provides greater utility for gripping small objects.
4. Patented design of tension edge provides more strength and eliminates stress concentration at channels.
5. New interlocking design minimizes stress on joint bolt.
6. Precision machined interlocking surfaces provide perfect fit, thus distributing pressure evenly.
7. "Rite Angle" teeth guarantee maximum bite and minimum wear.

Here's the new, improved Channellock Plier—bringing to you new features which offer more positive gripping, greater strength and longer wear. The undercut interlocking channel is the first really new idea in plier design in years. Engineering skill has developed a plier with new patented features which give you the newest, strongest, most practical plier you can buy. Here is a plier that will last for years! Channellock Pliers—made only by Champion DeArment Tool Co., Meadville, Pa.

Channellock pliers are listed in the Yellow Pages of most Telephone Directories under "Tools".

Self

Gripping

Channellock Self-Gripping Pliers incorporate the new revolutionary, powerful gripping, **Channellock** design providing a quick, positive grip when pressure is applied to only one handle. The greater the pressure, the tighter the grip. The exclusive tongue and groove **Channellock** joint makes a plier far superior to the conventional type of adjustable plier for these reasons:—**Greater Strength, Longer Wearing, Closely Spaced Adjustments, Self Cleaning, Visible Adjustment, No wear on Joint Bolt.** They are forged from high grade steel, and properly heat treated. Each plier is tested far beyond its intended capacity.

No. 407 Gripping Plier

Length 7". Capacity $\frac{1}{8}$ " to $\frac{5}{8}$ ". Weight 6 $\frac{1}{4}$ lbs. per doz. Two adjustments. Knurled grips.

This **No. 407** plier is primarily intended for battery work. The self-gripping feature insures a positive grip on acid corroded and mutilated terminal nuts. Its adjustable feature also makes it indispensable for many other kinds of work. Polished steel finish.

Packed $\frac{1}{2}$ dozen per carton.

No. 410 Gripping Plier

Length 9 $\frac{1}{2}$ ". Capacity $\frac{3}{16}$ " to $1\frac{1}{8}$ ". Weight 12 $\frac{1}{2}$ lbs. per doz. Four adjustments.

Our **No. 410** is a heavy-duty self-gripping plier which will hold work of any shape with a positive pipe wrench grip. Will exceed a pipe wrench in usefulness because of its light weight and streamlined design. Polished steel finish.

Packed $\frac{1}{2}$ dozen per carton.

No. 417 General Utility Plier

Length 7". Capacity $\frac{7}{8}$ ". Weight 6 $\frac{3}{4}$ lbs. per doz. Three adjustments. Knurled grips.

The **No. 417** is a heavy-duty plier with a gripping power many times greater than the ordinary slip-joint plier. Polished steel finish. Its superiority can only be appreciated by actual use.

Packed $\frac{1}{2}$ dozen per carton.

The NEW No. 420 Pump Plier

Length 9 $\frac{1}{2}$ ". Capacity $1\frac{3}{4}$ ". Weight 9 lbs per doz. Five adjustments. The wide range of adjustments of the **No. 420 Pump Plier** makes it adaptable to a multitude of uses. New strength has been added by the patented design of the tension edge. Interlocking channels and lugs prevent slipping. Wide base lugs provide maximum cross section strength.

Packed $\frac{1}{2}$ dozen per carton.

Gov't Specs.—GGG-P-471 or
MIL-P-15904 (Ships)—Type E—10 inch

No. 424 Ignition Plier

Length 4 $\frac{1}{2}$ ". Capacity $\frac{1}{2}$ ". Weight 16 oz. per doz. Four adjustments.

This **No. 424** ignition plier incorporates the **Channellock** adjustment feature in order to eliminate wear on the joint bolt and lengthen the life of the tool. A midget plier. Polished steel finish.

Packed $\frac{1}{2}$ dozen per carton.

cluded, please speci-
fy patterns by tool
number.

Our Display Board Offer

On the following pages we describe several types of CHANNELLOCK DISPLAY BOARDS. These boards offer a wonderful means of displaying and selling CHANNELLOCK PLIERS.

Display Board No. 26 is designed as a permanent display. The 26 different pliers are securely fastened in place with wing-nut clips and are lacquered to make a long-lasting, attractive display.

Display Boards No. 57, 75-A, and 87 are dispensing boards.

The pliers are held in place by a specially designed rack holding three of each pattern. Pliers can be sold right from these boards and at the same time the boards make a beautiful display which will enhance your sales room and greatly increase your turnover.

Send us your order for any one of these boards or all of them if you like. We will send the boards together with the assortment of pliers listed under each illustration and bill you for the pliers only. If you like, special assortments can be also arranged and also special sizes and colors. In the event you are interested in some type of special board, we suggest you write to us, giving us full information as to size, color, perhaps a sample of the desired color, and description of pliers you'd like displayed. Tell us if you'd like a dispensing type of board such as Board #57 or a permanent type of display such as Board #26. We'll give you our prompt reply as to delivery and cost involved. There will be no charge for the boards when shipped with a reasonable assortment of pliers. The boards will remain the property of the Champion DeArment Tool Co.

Drop Forged

No.	Weight	Wt. Doz.
-----	--------	----------

451 $\frac{1}{2}$	16 oz.	18 lbs.
-------------------	--------	---------

Packed one in an attractive gold colored carton

Made of Special Analysis Steel. Properly heat-treated to insure maximum durability for claws, face and body. Square face provides wider striking surface at edge of face and enables easier driving of nails close to abutting surface and in corners. Claws are clean-cut and sharp for easy gripping of nails of all sizes. Lacquered handle is moisture proof, full octagon, non-slipping, and easy on the hands.

MISCELLANEOUS TOOLS*

No. 99—Champion DeArment Utility Clipper

Wt. 30½ lbs. per doz.

Extra Heads

Wt. 12 lbs. per doz. (heads only)

Packed ½ dozen in carton

Drop Forged. Has few parts: two jaws, two handles, and four bolts.

The angle of the jaws throws handles above a level plane so that any position of work is accessible.

Tool is 15¾ inches long. Weighs 2¼ lbs.

New heads can be furnished and when installed make tools as good as new. "Stop" to protect edges is in the head. Designed with wide opening diagonal jaws for cutting battery terminals. Also makes an excellent clipper for small bolts, wire, etc.

No. 100—Improved Hoof Parer

Polished Head

Painted

Length

"T" Handles

14 Inch

Wt. Doz.

Packed ½ dozen in carton

This drop forged hoof parer likes tough work. Designed for rugged service. A "must" on any horseshoer's list. Made from special analysis steel and designed for greatest leverage and strength. Polished head, painted "T" handles. Cutting edges hand filed.

No. 148—Heavy Duty Cutting Nippers

Length

Wt. Doz.

8 Inch

10½ lbs.

10 Inch

13½ lbs.

14 Inch

26¼ lbs.

Packed ½ dozen in carton

This "Heavy Duty" Nipper is specially designed for Concrete Form Builders, Carpenters, Mechanics, Farmers and for Miscellaneous work. It will easily cut large nails, small spikes, form tie wires, reinforcement wire, etc. Drop forged from special analysis steel, and designed to give greatest leverage and strength. The stops prevent dulling of cutting edges and provide adjustment when edges have worn. Polished head, painted "T" handles. Cutting edges hand filed.

No. 167—Carpenter's Pulling Pincer

Length

Wt. Doz.

8 Inch

10½ lbs.

Packed ½ dozen in carton

Drop forged from special analysis steel. Designed with extra wide jaws and our popular "T" handles for maximum hand comfort. Full polished head, painted handles and hand filed cutting edges. An extra large rivet with large head gives long life.
